Version – Control

with

<https://git-scm.com/images/logo@2x.png>

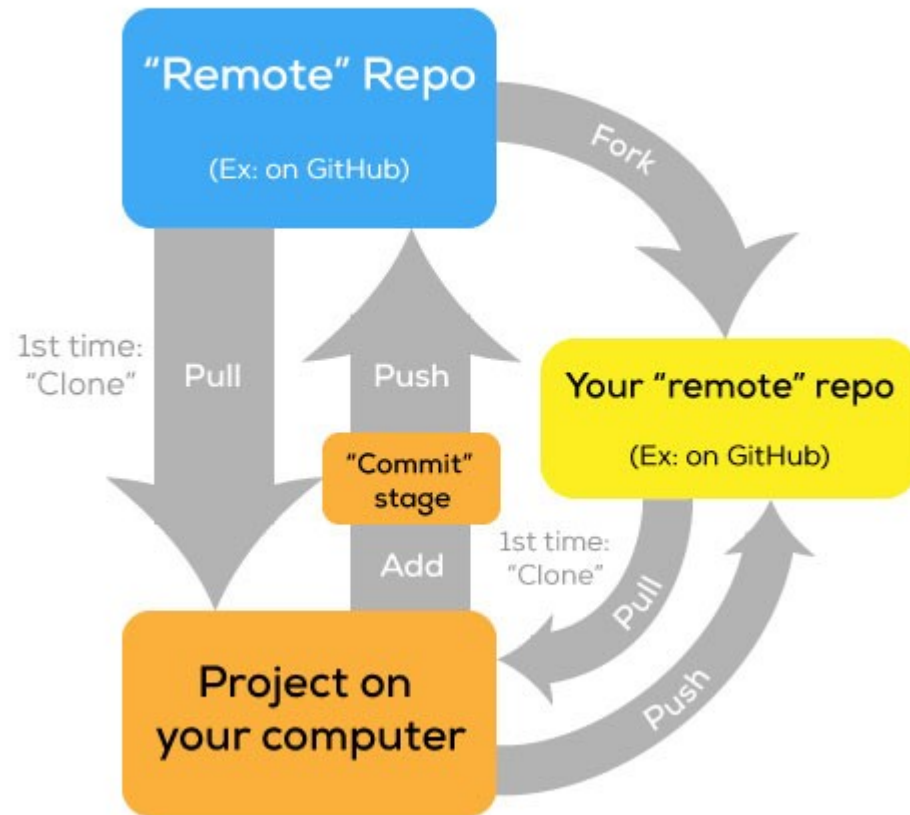

Nina Gnann

What is Git?

- Git is a **distributed version-control system**, which tracks changes in source code during software development
- Creator: Linus Torvalds (2005)
- Goals of the system:
 - Speed
 - Simple design
 - Strong support for non-linear development (thousands of parallel branches)
 - Fully distributed
 - Able to handle large projects like the Linux kernel efficiently (speed and data size)

Git for non-developers

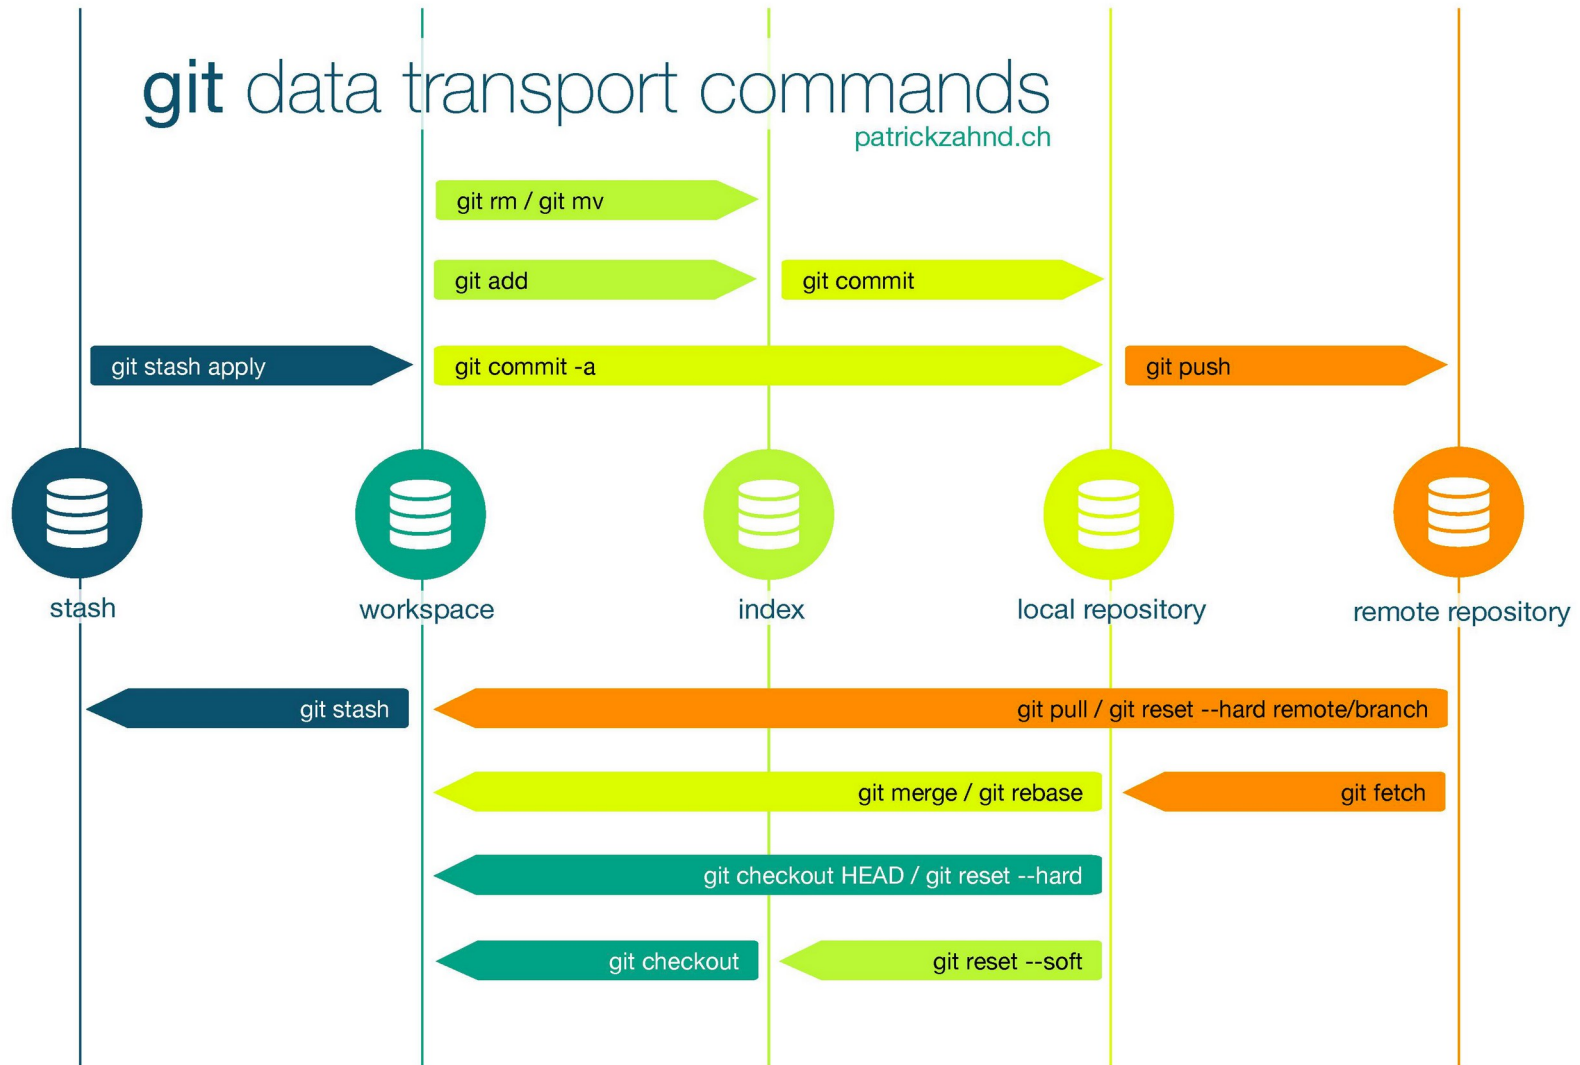

(in a tiny nutshell)
